JAIL SENTENCE.

Ashley Ward's Penalty for Shooting Sherley Frisbie.

In the Circuit Court at Cynthiana, the jury in the case of the Commonwealth against Ashley Ward for shooting Sherley Frisbie returned a verdict of guilty and fixed his punishment at nine months in jail and a fine of \$500. Ward, who is an attorney, shot Frisbie on February 23 in a difficulty on the streets of Cynthiana, Ward shooting Frisbie through both arms, Frisbie cutting Ward about the face. Affidavits were filed by attorneys for the defendant asking for a new trial.

Ward is in charge of Sheriff Gregg. Both young men are prominent in business and social circles and are well known throughout the State. Ward is a son of the late Harry Ward and a brother-in-law of Judge W. T. Lafferty.

The Auditor's Race.

Friends of Secretary of State H. V. McChesney are announcing him as a candidate for Auditor before the Democratic primary which will be called for November. McChesney's entry will make four candidates for this place on the State ticket, the others being Morgan Chinn, Henry B. Hines and Henry Bosworth. Friends of Lieutenant Governor Thorne say that he will be a candidate for Congress in the Seventh district.

BLOCK LIGHTS.

I have a large stock of the famous Block Gas Lamps. Lamp and mantle complete, only 50 cents. J. J. CONNELLY.

FARMERS' CLUB.

Sixty of Bourbon's Leading Farmers Enroll Their Names.

W. W. Neal, State Organizer for the Department of Agriculture, was here Monday and organized a Farmer's Club. The meeting was held at the court house at 2 o'clock and drew an audience of nearly one hundred people, mostly farmers. Mr. Neal addressed the audience and pointed out the advantages that would accrue to the farmers by united action, by the organization of clubs in the various counties of the State.

The organization was perfected with the election of Thomas Henry Clay, president; May Goff, of North Middletown, first vice president; W. A. Thomason, of the same place, second vice president, and Hon. A. S. Thompson, secretary and treasurer. Twenty-six names, all prominent farmers were enrolled as members.

SENATOR BLACKBURN

To Succeed Senator Gorman as Leader of Democrats in Senate.

The Democrats of the United States Senate will meet in caucus on Saturday or Monday, and in all probability Senator J. C. S. Blackburn, of Kentucky, will be elected the Democratic leader to succeed the late Senator Gorman, of Maryland. This decision, it is understood, has been practically reached by the leading Democrats in the upper branch of Congress. The death of Senator Gorman leaves a vacancy as Chairman of the Democratic Caucus, which carries with it the floor leadership.

It is a long time since the leadership of the Democratic party in the Senate has been held by a Kentuckian. Henry Clay led a minority there and John C. Breckinridge in the capacity of Vice President presided over the Senate. Thompson, Crittenden, Beck and Carlisle were great Senators, but none of them was technically the leader of the Democratic party on the floor of the Senate, a position shortly to be assumed by Senator Blackburn.

COMMENCEMENT

Exercises of the High School Last Evening.

The Grand Opera House was crowded last evening by the friends and patrons of the Paris High School to witness the commencement exercises. The exercises opened by a beautiful selection by the Elks' Band. Dr. E. H. Rutherford then followed with an invocation. Most excellent papers were read by Misses Gertrude Earlywine, Nellie Long and Lucille Price. The choruses by the scholars of the City School, under the direction of Miss Julia O'Brien, were highly enjoyed and places this young lady in the front ranks as a vocal teacher.

Dr. Hinitt, President of Central University, who was on the program for the address, and who, by the way, is one of the finest pulpit orators in Kentucky, failed to put in his appearance.

Prof. J. A. Sharon was in his happiest mood in the presentation of the diplomas. The growing success of the Paris High School is mainly due to the untiring efforts of Prof. Sharon.

The following composed the class roll: Miss Gertrude Earlywine, Mr. Jason Redmon, Miss Nellie Long, Mr. Milton Stern, Miss Lucille Price, Mr. Harry Stivers, Sam Shanker, Certificate.

Hay Against Hager.

It is announced by those in a position to know that Attorney-General N. B. Hays has definitely decided to enter the race for the Democratic nomination for Governor against Auditor Hager, and that he will formally announce in accord to the public as soon as the State Executive Committee calls the primary next week. It has been expected for several months that General Hays would make the race though recently there was some doubt about it. He intends to make a vigorous speaking campaign.

BANANAS ARE TENDER.

They Are Easily Chilled and Easily Become Too Ripe.

"You would not believe how tender these bananas are," said a banana man the other day. "They are more tender than eggs. They will chill, in fact, at 52 degrees—that is, the green ones, while the ripe ones will stand a somewhat lower temperature.

"A chilled banana never ripens. While green a banana will bleed when bruised, exuding a juice approaching the color of the fruit when it is ripened. Under the influence of cold this sap becomes chilled and dried, and the life is out of the banana. After that it breaks like a stick and is of about as much value as a stick for the purpose for which bananas are usually bought.

"From the time the bananas are taken green from the trees till they are sent out by the wholesalers in a condition approaching ripeness, a period of nearly a month elapses. At the Central American plantations they are loaded on big scows by negroes, poled out to fruit steamers and carried up to New Orleans. They are unloaded also by negroes, who carry the bunches to the scales before placing them on the cars. The whole load, negro, bananas, and all, is weighed and the African weight deducted. The produce men buy the bananas by weight in New Orleans, though they sell them by the bunch here. From the time they leave the plantation till they are loaded on the fruit train is usually a period of about four or five days.

"A messenger who knows bananas 'from the stalk to the tarantula' accompanies each train. He rides in the caboose, and he watches those bananas as a setting hen guards her eggs. The temperature in the car when they are loaded is usually from 60 to 70 degrees. Seventy, in fact, is a trifle too warm. The messenger is between two fires all the time, or, to put it more accurately, he is between heat and frost all the time. At 52 degrees the green bananas will chill, while a slightly lower temperature will absolutely ruin them. If a temperature of 70 or over be maintained throughout the journey of about fourteen days from New Orleans to the northwest, the fruit will arrive too soft and ripe and will very likely be worthless before it can reach the hands of the retailer.

"The fruit should reach here in a green condition, so as to require a few days in the ripening room before being placed on sale. This is a little room at the rear of the commission house in which the bananas are placed after their arrival. There an attempt is made to reproduce the warm, humid conditions of the Central American plantation. This effect is furnished by a little gas stove kept burning part of the time, over which is placed a pan of water to form the steam.

"Three to five days under these conditions usually place the fruit in shape to show to the retailer, who comes along the street with his eye peeled for the bright yellow color of the ripened bananas.

"For northern shipment the bananas are sent out in an unripe condition, wrapped in heavy manila paper, besides the straw wrapping, which is designed to protect them from bruising when sent out to the local trade. Some varieties are totally unsuited to northern shipment, as they would ripen too soon and be unfit for use before they reached the northern market.

"It is a remarkable fact in the case of ripened bananas that, though the cold will turn the skins a dark copper brown, giving them a repulsive appearance, the quality of the fruit, as far as flavor is concerned, is unimpaired. Notwithstanding this fact, the darkening of the color spoils their sale in the market, as they 'don't look good' to the uninitiated, and it is the outsider, after all, and not the commission man who eats them."—Seattle Post-Intelligencer.

Adder Stones.

The singular superstition of the value of adder stones for curing a variety of ills has continued in many countries from the time of the Romans. These celebrated charms are nothing more than antique green or blue glass striped in various designs and perforated. The virtues of these stones are sung in the poems of the ancient Druids and are mentioned by Pliny and other classical writers.

A Warning.

"See here!" said the theatrical manager. "You want to quit your overbearing behavior toward the other members of this company?" "Indeed?" haughtily replied the Thespian. "I am the star, am I not?" "Well, yes, but you want to remember that you're not a fixed star."—Philadelphia Press.

A Wonderful Record.

As made up by improved and exact processes Dr. Pierce's Favorite Prescription is a most efficient remedy for regulating all the womanly functions, correcting displacements, as prolapsus, anteversion and retroversion, overcoming painful periods, toning up the nerves and bringing about a perfect state of health. It cures the backache, periodical headaches, the dragging-down distress in the pelvic region, the pain and tenderness over lower abdominal drain, so disagreeable and weakening, and overcomes every form of weakness incident to the organs distinctly feminine.

"Favorite Prescription" is the only medicine for women, the makers of which are not afraid to print their formula on the bottle wrapper, thus taking their patrons into their full confidence. It is the only medicine for women, every ingredient of which has the strongest possible endorsement of the most eminent medical practitioners and writers of our day, recommending it for the diseases for which "Favorite Prescription" is used. It is the only put-up medicine for women, sold through druggists, which does not contain a large percentage of alcohol, so harmful in the long run, especially to delicate women. It has more genuine cures to its credit than all other medicines for women combined, having saved thousands of sufferers from the operating table and the surgeon's knife. It has restored delicate, weak women to strong and vigorous health and vitality, making motherhood possible, where there was barrenness before, thereby brightening and making happy many thousands of homes by the advent of little ones to strengthen the marital bonds and add sunshine where gloom and despondency had reigned before.

Our Washington Letter.

BY EARL W. MAYO.

Washington, June 6.—While Kentucky tobacco grower are having their own trouble with the tobacco trust, figures just furnished to the Department of State showing the revenues of tobacco trusts and government monopolies in other countries. In Australia there is a tobacco trusts which last year had a revenue of \$7,000,000, with a population of 4,000,000. There are now six factories as against nine before the combine, but the operatives have increased 12 per cent. with an increase of wages. The revenue per pound is 64 cents, the revenue per capita \$1.694, and the average wages per hour 12.4 cents. In France, Austria and Italy tobacco is a government monopoly, and, though it may seem strange, the people fare worse under this system than in Australia under the trusts. The revenue per pound in France is 75 cents, in Italy 90 cents, and in Austria 32 cents, while the average wage per hour as compared with Australia's 12.4 cents is only 4 cents in France, a fraction over three cents in Austria, and 3 cents in Italy. From these figures it would seem that those countries having a government monopoly, have their tobacco troubles, as well as Kentucky.

Now that Congress is in its last weeks, the regular scanning of the field for the large issues of the next session is going on. Having dealt with one means of transportation this year—that is, the railroads—it seems certain that next year will see a demand for legislation concerning another means, that, navigable stream all over the country. The is a growing feeling that the government should have an important and active part in developing the waterways of the country, and the enthusiasm with which the efforts of the National Rivers and Harbors Congress to this end have met indicate that this feeling will bear fruit. Such improvements as this Congress is working for would be of great value to Kentucky in developing the river commerce of not only the Ohio and Mississippi, but also of tributary streams within the State. There seems to be a general recognition of the fact that a broad policy on the part of the national government in dealing with this subject will occupy a prominent position in the business of the next Congress, which like its predecessor, will thus deal with the question of transportation, but with a constructive method.

While the rate bill has lost the center of the Congressional stage, it has by no means retired into the wings. There is considerable interest manifested in just what changes the conference committee of the Senate and House will make in the measure, it is not believed that these changes will affect it vitally. The exposures made at Kansas City, Philadelphia and in other places of gross violations of the rebate laws prove that the real virtue of prohibiting these transportation abuses. As the Senate has incorporated in the Hepburn bill the most stringent anti-rebate provisions, making libel to fine and imprisonment both the shipper accepting or soliciting such a rebate and the carrier granting it, the end of transportation abuses has come, provided the law is strictly enforced. With a logical rate-making power vested in the Commission together with provision for a comprehensive court review, there remains nothing in the bill for the conferees to fall out over, except a few minor points that easily can be arranged.

This is to be no "billion dollar" Congress. It is estimated now that when adjournment comes the expenditures that will have been authorized will be a little in excess of \$650,000,000. Representative Tawney, chairman of the House Committee on Appropriations has taken up the role dropped by Speaker Cannon of "watchdog of the Treasury." Early in the session he started in cutting appropriations to the bone and as a result the total budget will not exceed the amount mentioned unless the Senate votes some increases. The only increase of any magnitude made by the upper branch thus far has been in the naval bill, the appropriation being raised by \$2,461,037.

Exit the "immunity bath" for corporation. The Senate Committee on Judiciary has reported favorably on the Knox bill, only a few minor amendments having been suggested. The bill makes provision for immunity from prosecution only to any "natural person" who, in obedience to a subpoena, shall give testimony under oath, or produce evidence, documentary or otherwise, under oath before officers of the government. It will be remembered that the beef packers escaped heavy penalties on the plea that they were immune because they freely gave to Commissioner Garfield the information on which their prosecution was based, and that the commissioner had promised them that he would not use the evidence in a court of law. Now that this shield for corporation cupidity is removed the officials of the government will have plainer sailing.

The government lighthouse authorities are about to undertake a series of interesting experiments with submarine signalling, which, if successful, will prove of vast benefit to shipping.

Beginning at noon June 1, submarine bells will sound day and night from five different lightships in the vicinity of New York and Boston. Master of vessels equipped with apparatus for catching submarine signals have been requested to fill in details of the condition under which signals are intercepted, giving the condition of the sea, the state of the tide and winds and the distance for the lightship signalling. From this data the lighthouse board expects to compile important rules that will reduce submarine signalling to an exact science. As auxiliary to the wireless telegraph this underwater system of communication will be of immense value in warning ships of coming storms and receiving distress signals on shore.

It remained for an ordinary, everyday city policeman to unearth a band of counterfeiters this week almost within sight of the Treasurer and directly under the eye of the Secret Service Agents. The men were Italians, posing as workmen on the new union station, and they worked at odd hours turning out spurious coin. The police raided the cabin of the men, and captured them and their paraphernalia. MAYO.

AMERICA SAYS "NO."

Reds Will Not Be Admitted. Or If Discovered Here Will Be Deported.

Whether, if England and the Continental powers combine to deprive anarchists of any asylum abroad, they might find one in this country, was answered with an emphatic "No." According to Assistant Commissioner of Immigration Joseph Murray, the present laws, if enforced, are entirely adequate to keep anarchists out of this country. It is arrested, however, that closer watch can be kept on anarchists already here than is the general impression in Europe.

Dispatches from London suggested a possible crusade against the anarchists of England with the possibility that such action might result in an anarchistic immigration to America. "Any such immigration of anarchists could be checked the minute we learned of it," said said Assistant Commissioner Murray yesterday. "The present laws are certainly effective enough to compel the deportation of anarchists whenever they land in this country. The general impression that the possession of sufficient money will entitle an anarchist to come into the United States is wrong.

"No alien is admitted if it appears to the board of inquiry at Ellis Island that he is liable to become a public charge, to become an inmate of public institutions, as an insane asylum or a prison, or is undesirable generally. An anarchist can, of course, be deported under this provision.

"Moreover, the immigration laws provide that any anarchist can be deported solely because he is an anarchist."

Some Boys Should Be Hung.

A little boy played an "April Fool" joke on his mother that his fond father scarcely appreciates. The new and pretty servant girl was working in the dining room, and the man of the house had just come in the rear door, when the little son ran to his mother and shouted: "Oh, Mamma, there is a strange man in the dining room kissing Minnie." The mother immediately started for the scene of war, when the boy continued: "Oh, I April fooled you; it wasn't a strange man at all—it was papa who was kissing her."

SUBTERRANEAN RIVERS.

Yucatan's Only Streams Flow Beneath Coral Rock.

There are no streams in Yucatan which flow above the ground, but the whole peninsula is one vast table of coral rock and beneath it are immense sheets of fresh water, with regular though ill defined tides and currents. Along the coasts these subterranean waters are quite near the surface, but in the interior, where the calcareous layer is of great thickness, the waters are low down. At intervals they break into caverns formed by earthquakes by pressure of their own force or by the infiltration of surface water into the natural grottoes of the coral rock and wherever the water can be reached, whether through artificial pits or by the operations of nature, the place is called a cenote. There are a great many of them scattered all over Yucatan, and those near Merida are utilized as public bathhouses, affording most refreshing resorts.

Centuries ago the Indians marked the courses of the subterranean rivers by heaps of stones and always built their cities close by the water caves, as their ruins show, and it is interesting to note to this day all the civilized centers of Yucatan have arisen around these natural reservoirs. There are many forms of cenotes. When the water flows at a slight depth and the calcareous layer has been only partially eaten away there follows an irregular sinking, which forms a cave, opening from side to side, but when the crust is thicker and the underground stream has a regular course the soil is generally corroded in a circular space and the vault thus formed, lacking support, falls in, making an immense open well. Often the crust is so deep that the soft parts only crumble down, leaving a small aperture toward the top, fashioning a real grotto, with stalactites and stalagmites galore. Again, it happens that the crust is exceedingly thick, when a colossal subterranean passage, like a tunnel, is formed. In short, all the variations which an undisturbed stream may produce in a friable soil by the silent work of ages may be here witnessed. The cenote of which I write is a natural cavern nearly fifty feet deep, broken down at one side, thus forming a gigantic arch. Within it appears every form of stalagmite and stalactite, and its roof is perforated with holes, in which are thousands of birds' and hornets' nests. At the bottom of it, reached by a flight of stone steps from the charming garden above, is an extensive sheet of clear, fresh water, containing a multitude of tiny fish (Pescado cenote) similar to those found in the Mammoth cave of Kentucky, only these are not eyeless. The overhanging roots of trees fringe its broken arch, affording shelter to innumerable lizards and iguanas, which dart along the ledges like embodied sunbeams, while above them countless swallows circle in masses so dense that the whirling of their wings produces a deafening noise, echoed from below in hollow reverberations.

The Italian Baby.

No infant receives a warmer welcome to the world or is more happily born than the Italian baby. No infant is the object of more caresses or is more fondly admired. Indeed, no matter how poor the mother and father may be, no matter how large the family, they have very merry times when another son or daughter comes to them. The neighbors are invited in, a feast is prepared, a gallon or two of cheap wine is procured, and the merriment sometimes lasts several days. The Italian considers there are only three great events in the life of man—namely, his birth, marriage and death. These three events never pass without a gorgeous and elaborate celebration. In this simple way they strive to carry out the tender life lesson: "When you were born you wept while those around you smiled. So live that when you die you alone may smile and those around you weep." And so they laugh and drink wine and sing, for they believe it will have an effect upon the life of the quivering form soon to take its place among them.—London Standard.

ANOTHER BIG DAY.

Everything Looks Rosy for Bourbon Home-Coming.

The way things are looking Paris will have another big day on June 19, when the ex-Parisians and ex-Bourbons will be here at our home-coming.

Everybody seems to be taking interest and assisting in every way to make the day a success is being offered. Judge Dundon has offered the basement of the Court House for the lunch, etc. Speeches will be made by our best orators, the Elks' Band will furnish the music and it will be but another gala day in our old town.

We are requested to remind the ladies on the Committees about the meeting at the Court House, Saturday afternoon at 3 o'clock for the final arrangements. We can count on them being on hand with good reports, for Bourbon county women never fail in anything they undertake.

The meeting at the Court House will be held in the County Court room, and Commissioner Hinton wants all of the ladies who are not on the Committee, who feel interest in this matter, to be present at this meeting tomorrow afternoon. So please remember ladies, all of you are invited.

A. J. Winters & Co. have moved. Rather Peculiar Action.

Morehead & Company, stock brokers of Cincinnati, filed suit Wednesday at Lexington against the Lexington Bank and Trust Company to secure \$12,156.95, which the plaintiffs allege had been deposited to their credit in the bank. The suit grows out of certain stock speculations of Attorney C. J. Bronston, of that city, through the Board of Trade, which is the Lexington correspondent for Morehead and Company. The answer will be filed by Morton, Webb and Wilson, attorneys for the Lexington Banking and Trust Company. The bank will ask to be allowed to deposit the \$12,156.95 without the court to make the proper disposition of it.

It seems that Mr. Bronston ordered the bank not to honor the check. Nobody in connection with the Bronston side will talk and it looks rather peculiar. Can it be possible that somebody is welsching.

A. J. Winters & Co. have moved \$20,000 Donation.

At the commencement exercises at State College yesterday morning President James K. Patterson sprang an agreeable surprise upon the large assembly of friends by announcing that he had been able within the last few days to procure the necessary funds for the erection on the college grounds a library building which would meet all the requirement of the college.

The funds, which amounted to \$20,000 is the gift of Andrew Carnegie, the philanthropist and steel magnate. The news was very gratifying to the large assemblage of college friends and the President's announcement was received with warm applause.

A Few Pointers on Plumbing.

First, the way to get a good job of plumbing is to get good material; then to get it put in right you must get a good plumber. Health must be considered as we go along, you take an unsanitary job of plumbing it is the most injurious thing known to the health today. It takes experience to find these things out. To do a first class sanitary job in plumbing you must know how to do it, because water runs to a bath tub and from it is no sign that your job is sanitary. If in doubt of this call either 'phone 229 or see

A Town Wiped Out.

A tornado struck Gossel, a German Mennonite settlement 15 miles southwest of Hillsboro, Kas., yesterday. The town was practically destroyed, about 80 persons being injured. The most seriously hurt are Katie Hendricks, 12; Henry Ratzlaff, farmer, may die; Dr. Peter Richert, Rev. John Toeye. The tornado laid waste a strip 200 yards wide. Several stores and twelve residences were demolished and every residence in town damaged. Classen Mill and the German Parochial school, nearing completion, were wrecked. The large Mennonite hospital is only slightly damaged.

Suit for Back Taxes.

Sheriff John McElroy, of Fayette county, filed suit against the Adams Express Company to recover back taxes on their franchise and business in Lexington for five years. The amount stated in the suit for each year is \$20,000; in other words if the company loses the suit it will have to pay back taxes on \$100,000 for one year. The rate of taxation from 1901 to 1905, inclusive, averages about eighty cents on the hundred dollars, so that the company owes \$8,000 back taxes with an additional twenty per cent. penalty, making a total of \$9,600. The statements were filed and summons were issued on the company returnable June 11.

A BURLEY NEGRO

Attempts to Assault Two of Bourbon's Fair Daughters.

Several days ago, Robert Gibson, a negro, went to the residence of a well-known Bourbon county farmer, who was absent from home, the house being in charge of his two daughters. When they observed the approach of the negro they became frightened and ran into the house and quickly locked all doors and windows. They then telephoned to their nearest neighbors.

Gibson finding he could not gain entrance to the house went away, but shortly returned with a heavy stick with which to force an entrance. About this time two neighbors, in answer arrived on the scene and took charge of the negro, placed him under arrest and brought him to the Paris jail. After being placed behind the bars he began to feign insanity.

He was taken before Judge Dundon Tuesday and waived his examining trial. His attorney then filed with the court an affidavit setting forth that his client was in danger of his life, as frequent rumors had come to his knowledge that the people of community where the attempted assault was made were incensed and would probably make an attempt to lynch him, whereupon an order was issued to remove the prisoner to Lexington for safekeeping. Sheriff E. P. Clark and Constable Lee Beall carried out the order.

THE FISCAL COURT

Holds Regular Monthly Meeting. Full Attendance of Members.

The Bourbon Fiscal Court held its regular monthly meeting Wednesday and transacted considerable routine business. The full membership of the court was present, with Judge Dundon presiding.

The report of Road Supervisor Claude Redmon was read and approved. The Supervisor was allowed the sum of \$1,000 for construction and repair work during the month of June.

Claims to the amount of \$5,251.02 were allowed. The following orders were passed:

Requiring the Road Supervisor to repair and make safe the bridge at Paris Distilling Co., on Paris & North Middle-town pike.

That the County Attorney draw a deed in favor of Jerry Sullivan, of Centreville, for the old toll house near that place, and collect the purchase price, which was \$250.

That a committee be appointed to devise means and methods to ditch the turnpikes of the county, to purchase appliances and employ men and teams to prosecute the work.

The committee appointed to adjust differences between the county and Mr. Wm. Tarr for the construction of the Tarr pike settled upon the basis of balance of \$100, which was ordered paid to Mr. Tarr. The 1/2 mile of pike was then turned over to county.

The committee appointed to inquire into whether or not the county had the power to appoint a janitor for the Court House and pay for telephones in the offices of the county officials, reported that upon the advice of the County Attorney it was the duty of the court to employ and pay a janitor to care for the building; that the Court had the power to pay for the telephones now in use in the various offices. The Committee then recommended that the telephones be taken out. The recommendation was approved by a three to four vote.

The Fiscal Court was in session Wednesday and the action taken by that august body on a few little things were enough to make Maud "hee-haw" for the balance of the summer. For instance, a committee, composed of 'Squires Hopkins and Thomason, was appointed to investigate whether the county had any right to pay for the telephones in the county offices in the Court House. In the afternoon the committee filed its report, accompanied by a written opinion of County Attorney Moore, stating that by the law the county had the power to furnish telephones in each office, but that the committee recommended them taken out. The vote was put on the adoption of the report and resulted as follows:

For taking telephones out—'Squires Howell, Thomason, Hopkins, Anderson. Against—'Squires Mann, Barlow, Keller. 'Squire Claybrook refused to vote. The County Judge then said out goes the telephones, it saves the county \$300 a year.

Yes, gentlemen, it saves the county the paltry sum of \$300 a year but you surely forgot what you were doing, you were slapping the country people in the face and putting them to all kinds of inconvenience by voting to exclude the phones from the county offices. Ain't it a fact now, that you thought you were discommoding the town people when you voted to have them removed.

We are informed though that one of the magistrates on the committee said he was a county officer and he had to pay for two phones in his residence and the county officers in the Court House ought to do the same.

In this day the telephone is a necessity, it is a great saver of time. In this instance many of the farmers will loose many a day's work by having to come to town to consult with a county official on some important business, whereas he could have attended to it over the 'phone from his home in five minutes.

Hee-haw! laughs Maud; to save \$300 per year for the county! It is like not noticing mountains as you drive by but every little mole hill is attacked with a vengeance.

'Squire Mann, by the way, made a motion for the county to pay for the lighting of the court house clock. He looked beseechingly for a second to his motion but didn't find it. One magistrate said that's for the town people, let the city pay for it. He was reminded by 'Squire Mann that Paris was in the county and that the citizens of Paris pay one-fourth of all the county taxes. It's the truth, some of these Magistrates don't really know that Paris is a part of Bourbon county. Ain't it a shame? Why we don't ask you farmers to pay to keep up our good streets that you cut into with your heavy loaded wagons, or don't object to you driving your cattle up Main street when you could just as easy take one of the back streets. In fact, we know you live in Bourbon and are always glad to see you when you come to town. Now when we say "farmers" above, we really mean the farmer Magistrates, and we do wish that the real farmers will notify their respective Magistrates that Paris is in Bourbon county, and that the map shows it.

THE STREET OILING QUESTION.

The people have been clamoring for the streets to be oiled for several months, thinking perhaps, they were going to get one of the greatest luxuries for nothing—that is human nature. Mayor O'Brien went to work and had the Council to purchase an oiling wagon and the oil. He figured the cost as close as it could be figured and placed the cost of oiling at 5 cents per lineal foot in front of your property, which by the way is cheaper than it would cost to sprinkle with water daily. There is no law that will allow Mayor O'Brien to have the streets of Paris oiled free of charge, he cannot have the Council to levy a tax for this unless he violated his oath of office, and by this time the people of Paris have found out that he is not going to do this. It would cost the city between \$8,000 and \$10,000 a year to oil all the streets. The arrangements that Mayor O'Brien has worked out in regard to this matter we think is commendable to him, and are fair and just.

However, we only find our citizens here and there are complying with the oiling proposition. This won't do unless everybody has the oiling done. On one square you will find the oil in front of one house half way across the street, no oil on the opposite side; then several houses will be passed, no oil in front of them, etc., etc.

Figure this matter out for yourself and you will readily see that it is cheaper than water, that is if you want the dust laid, and who under the sun prefers dust to the small amount it costs to have the oil. The city is oiling the side streets and in front of the churches free. Let us have an up-to-date and uniform looking town. Those who are refusing to have the oiling done should take a second thought about the matter, and when they do will see the error their way.

We would suggest that some one in each neighborhood take the matter up, have measurements made and collect the money for same and hand to the Mayor and let him do the rest. It is impossible for him to make a house to house canvass in order to do the work and collect the money, so if you really want the streets oiled get busy and do as the Mayor stated in the papers.

KIMBALL ANNOUNCES FOR CONGRESS,

In this issue we announce the Hon. Wm. Preston Kimball, of Lexington, as a candidate for the Democratic nomination for Congress from this, the Seventh District. Mr. Kimball is now county attorney, of Fayette, and besides this office has held a number of positions of public trust, never has he been found wanting in filling the duties of any of them, for he has at all times discharged said duties with credit to himself and with honor to his constituents. He is an able lawyer and fine speaker, if sent to Congress he will be found, from the beginning, in the ranks of the able men of the House. Two years ago he was a candidate before the Lexington convention for the same honor to which he now aspires, his defeat being brought about by a combination of circumstances that is characteristic of all political conventions.

"DO IT TO-DAY!"

"And to think that ten months ago I looked like this! I owe it to German Syrup."

"The time-worn injunction, 'Never put off 'til to-morrow what you can do to-day,' is now generally presented in this form: 'Do it to-day!'" That is the terse advice we want to give you about that hacking cough or demoralizing cold with which you have been struggling for several days, perhaps weeks. Take some reliable remedy for it TO-DAY—and let that remedy be Dr. Boschee's German Syrup, which has been in use for over thirty-five years. A few doses of it will undoubtedly relieve your cough or cold, and its continued use for a few days will cure you completely. No matter how deep-seated your cough, even if dread consumption has attacked your lungs, German Syrup will surely effect a cure—as it has done before in thousands of apparently hopeless cases of lung trouble. New trial bottles, 25c; regular size, 75c. At all druggists.

COMPROMISE FOR \$10,000.

Owensboro Guarantors of State Fair Pay Up.

The offer of the Owensboro guarantors to compromise the deficit entailed by the holding of the State Fair at Owensboro in 1903, by the payment of \$10,000 to the Kentucky Live Stock Breeders' Association, was accepted at a meeting of the Executive Board of the Board of Directors of the Association. The deficit was about \$12,000. In the compromise it is agreed that each side shall pay its own attorney's fees and court costs, which will amount to about \$2,500 each.

In order to pay off all the indebtedness, the Live Stock Breeders' Association will have to draw on the surplus \$10,000 made at the Lexington fair last year. It will take about \$4,500 of the surplus. This will enable the association to pay dollar for dollar on the indebtedness incurred at Owensboro.

Good News to Women.

Father William's Indian Tea, Nature's Remedy, is becoming the most popular Female Remedy in use.

Pale, Weak, Nervous, Delicate Women suffering from those weaknesses and diseases, peculiar to their sex, will find in Father William's Indian Tea a wonderful Tonic and Regulator. It quiets the Nerves, puts on flesh, gives strength and elasticity to the step, brightens the eyes, clears the complexion and makes you well and strong again. Tea or Tablets, 20 cents. For sale by W. T. Brooks.

Satisfactory Explanation.

"Papa" was becoming impatient at the lateness of the hour when he remarked: "I can't see why that young fellow who is calling on Minnie hasn't sense enough to go home. It's near midnight." The little brother of the family just then came in, heard his father's remark and ventured some light: "He can't go, father. Sister's sitting on him."

Low Rates to Home-Coming.

On account of the Home Coming for Kentuckians, Louisville, Ky., the Southern railway will sell tickets from all of its stations to Louisville at rate of one first-class fare plus twenty-five cents for the round trip on June 11, 12 and 13, with return limit of June 23, 1906. An extension of this limit may be obtained to leave Louisville not later than thirty days from date of sale, by depositing ticket with the joint agent and making payment of fifty cents fee.

An elaborate program has been arranged and the occasion will prove an exceedingly interesting one to all Kentuckians. A number of special trains have been arranged for St. Louis, Kansas City, Denver, Texas and other points in the West, and Southwest Southeast, and a large number of ex-Kentuckians will return to their native State to visit old friends and relatives. Home Coming will be held at a large

number of points throughout the State. In order to enable those who desire to attend these celebrations, tickets will be sold from Louisville to points in Kentucky on June 16, 17 and 18th, to original purchasers of round trip tickets to Louisville account of the Home Coming, at rate of one first-class fare plus twenty-five cents round trip, minimum fifty cents, with return limit of July 23, 1906.

MUSKET 150 YEARS OLD.

Weapon Used in Wars Abroad as Well as Here.

One of the most interesting relics of bygone days which will be seen at the Home Coming in Louisville is an old flint-lock musket, owned by Col. J. W. Jones, of Powell county. The musket is over 150 years old and is in an excellent state of preservation. It was made in England and was brought to this country by a British soldier, who used it in the Revolutionary war. The next heard of it it was used in the battle of Waterloo. The weapon was then evidently in peace for some years, and was used again in the war with Spain and Mexico. It was next used in the battles between Mexico and Texas, when a Mexican soldier carried it.

Insure with W. O. Hinton. He has the right kind of insurance.
